TITLE : PLASTICS HAVING HIGH TRANSMITTANCE AND HIGH DIFFUSIBILITY

ABSTRACT : PURPOSE: To obtain a opal plastic having high total light transmittance and diffusing power and resistant to see-through.

CONSTITUTION: The objective plastic contains two or more kinds of diffusing materials having different particle diameters dispersed in a plastic matrix. The average particle diameter of the diffusing material having larger diameter is 2-20 μ m and that of the material having smaller diameter is $\leq 1.5\mu$ m.
